

AMT Datasouth Introduces the Documax 5380 SDM Printer

CAMARILLO, Calif., March 5, 2013 (SEND2PRESS NEWSWIRE) – AMT Datasouth Corporation (www.AMTdatasouth.com) is pleased to introduce the new Documax® 5380 narrow carriage (80 column), serial-dot-matrix (SDM) printer. The Documax 5380 is the latest printer to carry the storied Documax badge. It features the latest technology in motors, drivers and electronics. The Documax 5380 sets a new standard for cost of ownership and reliability.

The Documax 5380 was designed for multipart forms printing of both form-sets and tractor-fed formats. The Documax 5380 features a long life 24 pin head that prints an original and up to six copies at up to 360 cps, in a flat-bed straight through print station. Standard features include forms skew detection and tractor feeding from the back of the printer. Tractor fed forms can be torn off with no forms wasted. Standard interfaces are Ethernet, USB and RS-232 serial.

The standard Documax 5380 is offered with popular Epson and Oki emulations. Bluetooth connectivity is offered on an optional model. AMT Datasouth also can provide OEM customers with custom emulations for their unique requirements. Internal fonts provide letter quality character and high-speed draft printing as well as popular bar code and OCR characters. Again, AMT Datasouth can provide OEM customers with custom fonts to meet any special requirement.

Company President Joseph Eichberger said, “The Documax 5380 is an easy to use, rugged, versatile SDM printer and very attractively priced. This new printer is a good choice to replace aging Oki’s, Epson’s and other out of date printers. And, many folks who went with fragile lasers and inkjets will find this reliable, low cost, modern SDM is just what they need for their tough printing environments. ”

SDM printing is favored for low-cost printing and product reliability and is especially favored for back office and inhospitable environments. The Documax 5380 brings a modern implementation to this trusted technology. The Documax 5380 is priced below all comparable printers in its class and, with its four million-character ribbon, provides a low cost printing solution. Its rugged design assures reliability and long life even in the most demanding applications. The AMT Documax 5380 will deliver trouble free, cost effective forms printing in the warehouse, inventory stores, front and back-office, shipping and wherever trouble-free forms printing are required.

AMT Datasouth SDM printers are available to end users through authorized resellers. For complete Documax 5380 details see the product brochure and specification at <http://www.amtdatasouth.com/gallery/documax-5380-printer-series/>. The Documax 5380 is now being shipped.

About AMT Datasouth:

AMT Datasouth has been delivering SDM printers since the early 1980s. More than a half-million of its Accel and Documax brand printers have been sold into thousands of locations. The Company also offers a complete line of thermal bar code and label printers under its Fastmark brand. The Fastmark printers feature the renowned PAL™ application programming language to seamlessly integrate them into existing IT systems and can replace embossers, impact or other legacy printers without host reprogramming. AMT Datasouth has built its reputation on providing its customers with what they want. For additional information, visit: www.AMTdatasouth.com .
