

Android and iOS Users: FonePaw Mobile Transfer V1.0.0 Has Been Launched

HONG KONG, China and NEW YORK, Aug. 12, 2015 (SEND2PRESS NEWSWIRE) – Many times, you curse the cumbersome ordeal of mobile data transfer and prepare to shake with fury. This time, you don't have to just get a hammer, smash your phone and start over. FonePaw has launched a handy files migration tool called **Mobile Transfer** to help users transfer contacts, videos, photos and music from phone to phone with one click.

FonePaw Mobile Transfer enables people to transfer music, photos, videos, contacts and more between iOS and Android devices directly. The supported devices include iPhone 6 Plus, iPhone 6, iPad, Samsung Galaxy S6/S5, Note Edge/4/3, HTC One series, LG G4, Huawei Ascend Mate 7, Sony Xperia Z3 and almost all Android and iOS devices.

Mobile Transfer is stylish and dead easy to use. Simply install it on your computer, connect both the source phone and the target phone at the same time, select which data you want to move and start transfer.

“Who doesn't like switching to a new phone?” asked Issac Wade, founder of FonePaw. “It is just the data transfer tasks that make people furious. So we developed Mobile Transfer to meet the requirements of mobile phone users as it can move data from the old phone to the new one quickly. Android and iOS devices users who upgrade their mobile phone a lot – or switch between carrier, manufactures and platforms frequently – can all benefit from this software.”

Feature Highlights:

- * Installation is easy and quick. It requires very less memory and processor resources.
- * It's able to transfer contact, photos, videos, music and more from Android to Android, Android to iOS, iOS to iOS and iOS to Android.
- * It's quite fast itself but that will depend on the data you have on your source phone.
- * Support for a variety mobile phone brands like Apple, Samsung, HTC, Sony, MOTOROLA, LG, HUAWEI, Acer, etc, basically almost all iOS and Android devices.
