“As an industry-leading content manager, AnyTrans is also expected to help those who want to manage multi-cloud files after earning trust of over 10,100,000 iOS and Android users,” said Frank Kong, the CEO of iMobie Inc. “So we launched AnyTrans for Cloud – an all-in-one cloud manager to manage, transfer, and share files across multi-clouds. And everything here is 100-percent safe and private via the protection of Google 2FA and 256-bit SSL encryption.”

Highlight-Features of AnyTrans:

Manage All Multi-Cloud Files in One Single Platform:

As a tailored cloud manager, AnyTrans allows you to take control over all contents across multi-clouds at one place. Just one login, you can bind all cloud accounts together for management without switching apps back and forth. The “smart search” shortcut even helps fast spot the target files, folders or cloud across multiple clouds. With this flexible UI, you are free to add, delete, copy, and rename files as you wish.

Transfer Cloud Contents in Blazingly Fast Speed:

AnyTrans also brings users a flexible yet speedy cloud transfer. With it, you can enjoy an automatic cloud-to-cloud migration via setting a schedule, fast and convenient, or transfer files to the target cloud even without network. Moreover, it’s always simple and fast to batch upload or download stuff between clouds and computer.

Share Cloud Files Folders Via Simple Link:

For those who’d love to [share cloud contents](#), AnyTrans provides multiple ways for file sharing to meet various demands. Without re-downloading or re-uploading, you can just send a short link through email, Facebook, Twitter, Google+ via SSL 256-bit encryption protection. You have full control over everything shared by restricting download times, setting expired time, all in one place.
