

ARMCO to Present QC Benchmarking Tool ACES Analytics at MBA Technology Conference's First-Ever Tech Showcase

POMPANO BEACH, Fla., Feb. 18, 2015 (SEND2PRESS NEWSWIRE) – ACES Risk Management (ARMCO), a leading provider of web-based quality control software for the financial services industry, announced it has been selected to present during the inaugural “Technology Showcase” at the Mortgage Bankers Association’s (MBA’s) National Technology in Mortgage Banking Conference & Expo 2015 in Orlando. Scheduled as the Second General Session on Monday, March 30 from 10:30-11:45 a.m., ARMCO is one of eight vendors selected by the MBA to showcase technology solutions. According to the [MBA’s Residential Technology Committee](#), it selected the “most innovative products designed specifically to enhance the efficiency of the mortgage banking industry.”

ARMCO will present its ACES Analytics product, a quality control benchmarking solution built to provide lenders the ability to assess their QC results in comparison to industry averages.

“Given the current regulatory environment, quality control has never been more critical to lenders, but lenders in the past have not had a reliable way to understand what loan quality looks like across the industry and to see how their own results stack up,” said Avi Naider, chairman and chief executive officer for ARMCO. “Through ACES Analytics, lenders are able to anonymously compare their own loan quality to their peers to get a better understanding of their QC results, both overall and within individual products and categories of defects.”

“Mortgage market participants have attended MBA’s Tech Conference and Expo to see cutting edge products and services for years. At this year’s conference, leading vendors will showcase their latest developments during Monday’s general session, giving lenders the chance to see these new products on a side-by-side basis,” said Rick Hill, MBA vice president and executive vice president of MISMO.

This year’s MBA Tech Conference is being held at the Hyatt Regency Orlando on March 29 – April 1, featuring over 700 attendees from mortgage lending firms across the country. Keynote speakers for this year’s conference include former Secretary of Homeland Security and current CEO of Ridge Global Solutions Tom Ridge and Host of NOVA Science Now and Yahoo! Tech Columnist David Pogue. For more information about the event or to register, visit the conference website: <http://events.mortgagebankers.org/Tech2015/default.html>.

About ARMCO:

ARMCO – ACES Risk Management delivers web-based audit technology solutions, as well as powerful data and analytics, to the nation’s top mortgage lenders, servicers, investors and outsourcing professionals. A trusted partner devoted to client relationships, ARMCO offers best-in-class quality control and

compliance software that provides U.S. banks, mortgage companies and service providers the technology and data needed to support loan integrity, meet regulatory requirements, reduce risk and drive positive business decisions. ARMCO's flagship product, ACES Web Audit Technology(TM), is available at any point in the mortgage loan lifecycle, to any size lender, and is user-definable. ACES Web standardizes audit requirements, ties pre-funding reviews to post-closing quality control audits, enables seamless trend analysis, identifies credit, compliance and process deficiencies and helps create manageable action plans.
