

Capital Industries Shares the Signs Commercial Concrete Flooring Needs Patching

MATTITUCK, N.Y., April 27, 2020 (SEND2PRESS NEWSWIRE) – The team at Capital Industries has some outstanding information for today's commercial operators that deal with extensive concrete flooring on their properties. There are vital signs to look for that suggest that it is time for an industrial freezer floor or [warehouse concrete floor repair](#). When these signs emerge, it is necessary to utilize the high-quality concrete patch products that Capital Industries provides.

Send2Press® Newswire

Types of Concrete Cracks

There are many different types of cracks that can appear in a commercial setting. These issues are common in the concrete surfaces of distribution centers, warehouses, and commercial freezer units. They can range from scratches, and gouges, to stains from forklift tires, and damage from pallet jacks. Outright cracking in the floor's concrete surface is also typical. These issues can lead to a host of problems such as reduced flatness of the surface and further degradation of the surface.

Methods of Fixing Concrete Cracks

The methods for repairing cracks vary depending on the surface and the issue.

Simple cracks are repaired quickly enough with injections of epoxy.

Take care of the joint repair on concrete floors by cutting out the damaged area and filling with one of our concrete patching products.
