

Capital Industries Shares the Top Reasons to Coat Industrial Floors

MATTITUCK, N.J., Oct. 30, 2019 (SEND2PRESS NEWSWIRE) – Capital Industries, a leading [non-slip floor coating](#) manufacturer, works with industrial companies on selecting the right floor coating. After years of impact and daily use, floor coatings can wear down. Without the protective coating, industrial floors are easily damaged by foot and vehicle traffic.

Send2Press® Newswire

Deteriorating floors can lead to workplace accidents and reduce productivity. By coating or recoating industrial floors, there are many advantages available with epoxy.

1. Safety

Preserve the safety of industrial locations by adding a [non-slip epoxy floor coating](#). KwikBond's Retrax is unique because it is not only non-slip, but also provides traction when oil, grease, water, and ice spills on it. It is also USDA approved for meat and poultry plants.

2. Durable

Industrial warehouses see a lot of vehicle traffic from forklifts from day in and day out. Having a tough coating is essential to last against the frequent use. KwikBond's Repox FC is an advanced formula coating system that provides an extended life for heavy traffic applications.

3. Strong Adhesive

Having an excellent bond to concrete is important. With Repox-HB, it bonds to not only concrete, but also block, steel, wood and almost any other sound surface. This industrial floor coating is best used in areas where floors need to be washed.

KwikBond's Retrax bonds to concrete and almost any other surface, including metal, wood, terrazzo, tile, and slate. It has a high bonding action that can also provide durability over time.

Uses for Floor Coating

Using epoxy provides a high strength, durable, and stable coating for industrial floors.

Uses include:

- Steps
- Ramps
- Exits
- Catwalks
- Fire stairs
- Processing areas
- Entranceways
- Equipment
- Loading docks
- Marine docks
- Flat beds
