

Charles County Public Schools Selects New Synergy Analytics Module by Edupoint

LA PLATA, Md., April 4, 2017 (SEND2PRESS NEWSWIRE) – Edupoint® Educational Systems, creator of the industry-leading Synergy® Education Platform for K-12 student information and learning management, has been selected by Charles County Public Schools (CCPS) to implement the company's new Synergy Analytics solution, currently available to alpha adopters. CCPS serves over 26,000 students across 36 campuses in Maryland.

The district is currently implementing Synergy Student Information System (SIS), Master Schedule Builder, the TeacherVUE® Portal With Gradebook, Synergy Online Registration, and the ParentVUE® and StudentVUE® portals for the 2017-18 school year.

Synergy Analytics is a comprehensive K-12 analytics solution for improving student performance and district administration by bringing all of a district's data together in one place and transforming that data into interactive visual dashboards that are easy to understand and interpret. Role-based views provide all stakeholders, from classroom teacher to superintendent, with the up-to-date information they need to make effective day-to-day decisions – both instructional and operational.

Synergy Analytics can help educators pinpoint student learning needs, measure the effectiveness and ROI of programs and resources, and compare Synergy data side-by-side with non-Synergy data. The solution features an Early Warning System that automatically identifies at-risk students so teachers can take action right away to help them get back on track.

“We’ve been doing analysis of data and testing for many years with a homegrown system,” said Pete Cevenini, Chief of Instructional Technology for CCPS, “and as we move to a modern student information system with Synergy, it makes sense to look at how we’re going to ensure that our solution for data analysis is a good fit. We looked at Synergy Analytics at the latest Synergy Users Conference in Anaheim where it was presented and decided: this is the answer.

“With our existing analytics system, it can be a long, drawn-out process for a principal to look at discipline rates for different sub-groups in order to better work with those sub-groups to improve discipline. With Synergy Analytics, our hope is that a principal can look at that in a dashboard format and make real time decisions for their school.”

“Synergy Analytics is a powerful tool for Synergy partner districts that brings all their data together in one place and helps educators understand and harness that data to provide maximum benefit to students,” said Bob Weathers, Founder & CEO of Edupoint. “We are pleased that Charles County has chosen Synergy Analytics and confident that it will dramatically improve the district’s ability to gain meaningful, actionable insights from their data.”

About Edupoint Educational Systems:

For over thirty years, the leadership of Edupoint Educational Systems has provided well-designed, technologically-advanced student data management systems that empower all K-12 stakeholders with the tools they need to improve student achievement. The fully-integrated Synergy® Education Platform includes Synergy® SIS, the most powerful K-12 student information system available today, Synergy® LMS, an all-in-one learning and assessment platform, and Synergy® SE, a comprehensive special education data management system. Thousands of schools nationwide choose the Synergy Education Platform to support more than 3.5 million students.
