

Civic Resource Group International Launches CivicConnect Project Audience on the Salesforce AppExchange, the World's Leading Enterprise Apps Marketplace

LOS ANGELES, Calif., March 30, 2015 (SEND2PRESS NEWSWIRE) – Civic Resource Group International today announced it has launched CivicConnect™ Project Audience on the Salesforce AppExchange, empowering and enabling arts and cultural organizations and businesses operating in the public sector to connect and provide rich services and cultural experiences to citizens through a variety of digital channels.

CivicConnect™ Project Audience, a technology-enabled resource for building audience participation in arts and cultural events, is a key component of the national Project Audience initiative. It provides dynamic aggregation, distribution, and analysis of cultural data and information for local and large scale regional events and community programs, thus benefiting both organizers and the audience.

While built on the proprietary CivicConnect™ Cloud/Data/Mobile Platform, the app is fully integrated into the Salesforce1 Platform, the social, mobile and cloud customer platform built to transform sales, service and marketing. CivicConnect™ Project Audience is currently available on the AppExchange at <http://www.appexchange.com/>.

Comments on the News:

“CivicConnect Project Audience connects arts, culture and community – all in the Cloud. This unique platform enriches both the audience experience and the cultural vitality of the community. It is a stellar example of how the broad public sector-cities, arts and cultural organizations, transit providers, tourism and economic development, etc. – can make disparate sources of data and information more useful to citizens and businesses and better engage them. The long term vision working with the National Project Audience Organization is to create a true national cultural data network by connecting regional instances of CivicConnect Project Audience. Culture in the Cloud – its time has come!” said Gregory G. Curtin, Ph.D., Founder and CEO.

“Companies are looking to transform the way they connect with customers, partners and employees to thrive in the today's connected world,” said Ron Huddleston, Senior Vice President, ISV & channel, Salesforce. “By leveraging the power of the Salesforce1 Platform, Civic Resource Group International provides customers with the proven social, mobile and connected cloud technologies to accelerate business success.”

Connect in a Whole New Way with Social, Mobile and Connected Cloud Technologies:

When deployed, the Cloud/Data/Mobile platform-based CivicConnect™ Project Audience automatically imports cultural event data from wide range of existing local arts and cultural listings and feeds it into full-featured public-facing online event calendars, or integrates into existing programs/systems for data aggregation, distribution and analytics.

With this collected information the cloud-based CivicConnect™ Project Audience becomes a central portal for local/regional cultural event information. It also shares data with many popular web-based calendars, ticketing, event information, geo location and public transportation programs that serve the general public. The platform can be scaled for limited local or large-scale regional implementation.

Product Key Features:

CivicConnect™ Project Audience gives people easy way not only to research information on cultural events in a particular locale, but plan the logistics around getting to the event, map, identify public transportation and research the destination area – from retail outlets and special deals to places to eat while at the event. In the near future, Civic Resource Group International plans to add new features: Mobile Teleporting, Augmented Reality and Geo-directional pointable search, patented mobile technology that will allow users to actually be able to “see” the destination and data around the event area and interact with it.
