

CosaTron Announces Launch of CosaClean Whole House Air Purification System for Residential Use

CONCORD, N.C., May 18, 2017 (SEND2PRESS NEWSWIRE) – CosaTron, a global supplier of air purification equipment to the commercial and institutional markets for six decades, announces the introduction of its CosaClean product line into the residential market.

Send2Press® Newswire

“The newly developed and patented system was designed to provide effective indoor air quality control to the residential environment, previously only available to commercial and institutional end users,” said Eric Bratton, President of CosaTron.

The residential product is expected to experience significant market share growth in the coming months. Made in the United States, the CosaClean product is being released for consumer shipments starting May 2017.
