

D-Link India signs MoU with Telangana government for collaboration to develop local IT industry and cultivate local talent

TAIPEI, Taiwan, June 5, 2015 (SEND2PRESS NEWSWIRE) – Driving forward with their local India presence, D-Link signed a Memorandum of Understanding (MoU) with the Telangana government to bolster the local IT industry by improving network infrastructure, investing in the region, and developing new talent.

As part of the collaboration, D-Link will work together with the state government to provide public Internet access by deploying Wi-Fi hotspots that will provide wireless access to all citizens and institutions. D-Link will also upgrade government networking infrastructure to meet the latest security standards, reducing the risk of vulnerabilities and cyber-attacks.

Additionally, D-Link will increase investment in the area, expanding their Hyderabad offices, establishing a global R&D centre, and creating a network training centre. Through this academy, D-Link is looking to grow local talent and create jobs through education, recruitment, and training of local personnel.

“In 1990, D-Link entered the Indian market, and in 2001, we were listed on the NSE. Now, we have over 80 distribution channels and more than 2,000 sales partners in India. India’s potential as an emerging market is immense, and Hyderabad is quickly becoming a major tech hub. By supporting its growth and fostering talent, we believe we can open up new opportunities for both India and D-Link, creating a win-win situation,” D-Link CEO Douglas Hsiao said.

About D-Link:

D-Link® is the global leader in connectivity for home, small business, mid-to large-sized enterprise environments, and service providers. An award-winning designer, developer, and manufacturer, D-Link implements and supports unified network solutions that integrate capabilities in switching, wireless, broadband, storage, IP Surveillance, and cloud-based network management.
