# DataNumen Excel Repair 2.9: Smart Algorithms Boost Spreadsheet Data Recovery

NEW YORK and HONG KONG, Dec. 10, 2020 (SEND2PRESS NEWSWIRE) — DataNumen, the software manufacturer specializing in professional data recovery tools, has announced the release of DataNumen Excel Repair 2.9. This program quickly restores damaged Excel spreadsheets with the highest recovery rate in the market (78.7% against 65.7% of the second-best tool). The new version features AI algorithms for improved performance, a redesigned batch repair engine, and support for all Excel formats (including Excel 2016, 2019, and Excel for Office 365).

Send2Press® Newswire

Microsoft Excel is undoubtedly the most popular spreadsheet program in the world. It has 750 million users worldwide: large corporations, SMBs, and individuals use this application for data analysis, budgeting, accounting, sales, and more. That is why Excel files (XLS and XLSX) often contain extremely valuable information. What if they become inaccessible due to hardware malfunction, power failures, or virus attacks? It can disrupt business processes and sometimes even cause significant financial losses.

To prevent such undesirable consequences, it is advisable to install an efficient Excel recovery tool in advance — for example, DataNumen Excel Repair. It is a professional-level recovery program that uses AI technology to analyze the damaged Excel file and restore as much data as possible. Comparative tests have demonstrated that DataNumen Excel Repair restores 78.7% of Excel data, while the result of the nearest competitor is only 65.7% (and the integrated repair function of MS Excel recovers only 11.7% of lost data).

DataNumen Excel Repair recovers spreadsheet data in full: cell data, custom and standard formats, formulas (including shared and array-entered formulas). Besides, it supports all Excel formats and versions, from Excel 3 to 2019 and Office 365 formats.

The program has an uncluttered interface, which makes it extremely easy-to-use. The whole process takes just a few clicks: the user picks the file that needs to be repaired, provides the name and location for the output file, and clicks "Start Repair". When DataNumen Excel Repair successfully generates a new error-free file, the user gets a pop-up message. If there are multiple damaged files, batch recovery is also available under the correspondent tab.

Key Features of DataNumen Excel Repair 2.9:

- Recovery of XLS, XLW, and XLSX files created on Windows and Mac;
- Support for Excel version 3, 4, 5, 95, 97, 2000, XP, 2003, 2007, 2010, 2013, 2016, 2019 and Excel for Office 365 formats;
- Recovery of all spreadsheet data: cell contents, formulas, standard and custom formats;
- Recovery of Excel files on corrupted media (disks, memory cards, flash drives, etc.);
- Support for batch recovery;
- Context menu integration (right-click recovery);
- Drag & drop support.
