

DataNumen Excel Repair 3.6: Excellent AI-Based Data Recovery and Multilingual Interface

NEW YORK, N.Y., March 23, 2021 (SEND2PRESS NEWSWIRE) – DataNumen company, the creator of award-winning data recovery tools, announces the release of the updated version of DataNumen Excel Repair. Apart from the sheer simplicity and high recovery rate, version 3.6 now offers a multilingual user interface: it now supports Spanish, French, German, Italian, Portuguese, Russian, Japanese, Korean, and Simplified Chinese.

Send2Press® Newswire

MS Excel is the de-facto standard for spreadsheet applications: it is used for recording and analyzing numerical data by businesses and individuals all over the world. All in all, there are 750+ million users who employ Excel for accounting, sales, scientific and educational purposes, budgeting, data analysis, and other tasks. Unfortunately, Excel spreadsheets can easily get damaged or corrupt because of such common reasons as power failures, OS errors, malware attacks, etc. What should one do if their important Excel files have become inaccessible?

To prevent the disruption of business processes or the loss of important personal data, it is highly recommended to install a reliable and powerful Excel recovery program – such as DataNumen Excel Repair. It demonstrates the **highest average recovery rate** due to the use of smart algorithms but does not require any special tech skills to repair corrupt spreadsheets. Besides, if a massive data catastrophe has damaged multiple Excel files, it is possible to restore them all in one go using the batch processing feature.

The newly released DataNumen Excel Repair 3.6 makes data recovery even easier than before. It offers a multilingual interface so that people who do not speak English could choose another widely spoken language: Spanish, French, German, Italian, Portuguese, Russian, Japanese, Korean, or Simplified Chinese. Besides, version 3.6 can automatically check and install upgrades, thus saving the user's time.
