

# deveLLAB Electronics Inc. Named as 2015 CES Innovation Awards Honoree

LAS VEGAS, Nev., Jan. 6, 2015 (SEND2PRESS NEWSWIRE) – deveLLAB Electronics Inc. today announced that it has been named a 2015 CES Innovation Awards Honoree for its xerøLAN™ xl450D-4S2H 4 port network switch. Products entered in this prestigious program are judged by a preeminent panel of independent industrial designers, independent engineers and members of the trade media to honor outstanding design and engineering in cutting edge consumer electronics products across 28 product categories.

Built for speed, the xerøLAN™ xl450D-4S2H delivers 5 Gigabit switched network connections between systems over standard USB 3.0 cables and connections. The 4 port network switch includes the flexibility and convenience of two additional USB 3.0 ports to your computer. These allow you to connect two USB peripherals – such as digital cameras, printers, external hard drives, mice, keyboards, flash drives, and tablets – and share them across any of the four connected systems.

“We welcome the industry’s acknowledgement and support for the type of transformational innovation offered by our patent pending USB3 XFR technologies,” beams co-founder Ren Condotta. “Inspired by the needs of a global consumer electronics company, we managed to unlock a new potential for using standard USB 3.0 technologies to deliver 450 megabyte per second file transfer capability. USB 3.0 is key to reconnecting the proliferation of smaller computing systems, such as tablets, convertible laptops, phablets and even smartphones.”

Adds co-founder Chris Whittington, “With over 1.8 billion systems in the market today that support USB3, xerøLAN delivers an uncompromising speed, simplicity and connectivity at attractive price points. Wireless networks are great for internet access but wholly unsuitable for large file transfers; xerøLAN fills a growing gap for fast and secure file transfer, synchronization and plug’n play networking across a broadening array of systems.”

The prestigious CES Innovation Awards are sponsored by the Consumer Electronics Association (CEA)®, the producer of the International CES, the global gathering place for all who thrive on the business of consumer technology, and have been recognizing achievements in product design and engineering since 1976.

deveLLAB’s xerøLAN™ xl450 4 port USB3 network switch will be displayed at the 2015 International CES, which runs Jan. 6-9, 2015, in Las Vegas, Nevada.

Entries are evaluated on their engineering, aesthetic and design qualities, intended use/function and user value, how the design and innovation of the product directly compares to other products in the marketplace and unique/novel features present.

Products chosen as CES Innovation Honorees reflect innovative design and engineering in some of the most cutting edge tech products and services coming to market.

2015 CES Innovation Honoree products are featured on <http://CESweb.org/Innovation>, which lists product categories, as well as each product name, manufacturer information, description, photo and URL.

**About develLAB Electronics Inc.:**

Three year old develLAB delivers Universal High Speed Data Connectivity for bandwidth intensive data exchange, at the lowest cost points and least configuration. Built to leverage ubiquitous USB 3.0 technologies, the company's patent pending USB3 XFR™ provides advanced networking solutions for multiple markets. develLAB Electronics Inc. is a graduate of RIC Centre Incubator program – a part of ONE (the Ontario Network of Entrepreneurs). Based in Mississauga Ontario Canada and Buffalo, New York, develLAB has a presence in Portland Oregon.
