

DrivenBI Accelerates Reporting and Collaboration for United SheetMetal, Inc., a leading multinational manufacturer in the United States, China and Taiwan

PASADENA, Calif., Dec. 10, 2013 (SEND2PRESS NEWSWIRE) – When the top management of United SheetMetal, Inc. had been seeking ways to reduce inventory, maximize gross profit, improve product quality and optimize the supply chain, they selected SRK, DrivenBI's cloud based analytics platform. SRK replaced their spreadsheet-based analysis system. SRK enables businesses to carry out holistic analysis across different aspects of operations. Results of analysis are presented according to the user's access level in dynamic user views, shareable report snapshots and a real-time intuitive dashboard interface.

This cloud-based analytic platform by DrivenBI has replaced spreadsheets to speed up analysis, decision-making and collaboration, while at the same time reducing human cost and errors.

"It is exciting to see how United SheetMetal, Inc. has benefited from SRK. They have been struggling with spreadsheets for years. SRK replaced their spreadsheet-based analysis and brought new insights into their operations," said Ben Tai, CEO and founder of DrivenBI.

According to Paul Tsai, the president of United SheetMetal, Inc., "I have a better visibility to my business after using SRK, and I can make decisions faster and more efficiently. With SRK's replacing spreadsheets, I am getting reliable analysis across multiple functional areas while not having to worry about delay and inaccuracy, and without being worried critical business logic resided with particular staffs or hidden in spreadsheets."

Product Key Features:

- * Combine multiple data sources easily and replace spreadsheets for analysis;
- * Collaborate without the need to track emails and threads discussing the details of spreadsheets;
- * Apply user access and role-based access security to data viewing and report distribution;
- * Establish centralized formula control for edit and audit;
- * Export reports and dashboards into PDF or Excel formats for post-analysis processing;
- * Access reports and dashboards on mobile devices.
