More newly added features to [EaseUS Todo Backup software 9.2](#), particularly the workstation edition, mainly aim at making it more suitable for small business application. Tuned user interface of EaseUS business backup solutions becomes more intuitive and simple for IT admins, technicians, consultants, service providers or organizations to apply for easy business backups and work closely ever with EaseUS Backup Center, centralized backup management which also has been updated to the 9.2 version at the same time.

Although there is no major change on core backup technology, this 9.2 new update still centers on key backup function, for example diverse backup modes

including full, incremental, differential, schedule and smart backup ways. System, disk, partition, file and email backups have already been strengthened to a large extent for maximum security of any information. Advanced disk imaging technology makes exact backup activities go on well fluidly. Besides, quick recovery from destructive disasters on PCs, laptops or Servers, such as hardware failure, virus attack, system crash, human damage and error, saves all crucial data with cost cut down to let whole workflow continue without interruption.

Regular **data backup** matters most especially for business success. All backup policies should work as natural as primary insurance plans for forever data safety. No matter for personal usage or for business projects, risk-free EaseUS Todo Backup 9.2 centers around data protection and sustainability against any inherent and external crisis.
