

EaseUS Announces New MobiSaver for Android 4.5 Fully Compatible with Android 6.0 Marshmallow

NEW YORK, N.Y., Feb. 17, 2016 (SEND2PRESS NEWSWIRE) – EaseUS has pushed forward and released MobiSaver for the Android 4.5 appearance with rock solid Android 6.0 Marshmallow and Windows 10 support. The software is tested to perfectly cover Android 1.5 to 6.0 mainstream models from different manufacturers including Samsung, Google Nexus, HTC, Sony, Motorola, ZTE, and Huawei.

EaseUS MobiSaver for Android 4.5, a professional [Android data recovery solution](#), is designed to work together with a bunch of new features and updates of Android 5.0/5.1/6.0 especially on the Windows 10 based platform by simple and direct user interface. MobiSaver for Android 4.5 securely recovers contacts, text messages, photos, videos, audio or documents from accidental deletion, operating system corruption during software updates or new ROM flashing, formatting, rooting, virus attacks and other data loss situations.

Android “rooting” is a means to unlock hidden features of the Android operating system. However, benefits and risks always go together. For attaining privileged control over various Android subsystems, it allows Android users to speed up phone, boost battery life, guard privacy, access root-only apps and enjoy customized features – but also it’s risky to cause data loss in the process. MobiSaver for Android 4.5 gives an access to scan rooted devices to restore lost files in a safe way.

A broad variety of Android devices can be automatically identified when connected to PCs and laptops where MobiSaver for Android 4.5 is installed at a fleeting speed. It may take a few minutes to breeze through all retrievable files on smartphones running Android OS.

This Android data recovery program scans devices including the popular Samsung S6, Google Nexus 6 and Nexus 6P for deleted data by few steps. After all the files are located and listed, it’s quite flexible to preview all files one-by-one to retrieve what matters most.

Regularly backing up data on Android phones can help in case of data loss and play an important part in the future direct recovery progress. EaseUS [data recovery for Android phones](#) is a life saver for any data loss disaster.
