

EaseUS MobiSaver for Android 5.0 Updated to Make Android Data Recovery as Easy as Possible with Obvious Recovery Effects

NEW YORK, N.Y., May 12, 2016 (SEND2PRESS NEWSWIRE) – EaseUS launches MobiSaver for Android 5.0 offering Android data recovery sure to complete fast with greater success, especially from SD cards as Android phones are rooted. Meanwhile, real-time notices of recovery results on Android phones keep users always clear about whole data recovery course. German and French are also fully supported by the 5.0 version.

EaseUS, a global leader in data recovery and protection, makes MobiSaver for Android 5.0 – a professional [Android phone recovery](#) solution stay focused on practical recovery quality. Phones' capability, portability and potentials contribute to the broad use in most occasions. Modern people get accustomed to storing files in mobile phone in handy for reference whenever.

However, data loss on mobile phones often occurs, like accidental deletion, OS crash, rooting, virus attack, device outage and improper operation. Before data recovery starts, Android phone rooting is required to acquire privilege to access data. It's just out of data security and privacy concern. Time is much critical for urgent data recovery. The 5.0 edition makes data recovery from android devices easier than ever before. It only takes three simple steps to get lost data including SMS, contacts, photos, videos, audio and document back. Connecting Android phones or tablets to Windows PC/laptop, scanning and lost file search get started automatically in a flash.

In addition, full support for Android 6.0/5.1/5.0 and previous OS allows MobiSaver for Android 5.0 to be applied to diverse Android devices range from Samsung, Google Nexus, HTC, Motorola, Sony, HUAWEI to Lenovo. What's more, previewing before recovery is available to make sure better recovery quality. Also if necessary, it's quite useful to export lost contacts and messages in selected file formats for further recovery.

EaseUS [Android data recovery software](#) sends out helpful notice in real time to notification center of Android phones and keeps users informed of all recovery results with high efficiency. All thoughtful designs are just for better user experience and greater peace of mind in daily digital life.
