

EaseUS Newly Delivered Backup Center 5.0, Professional Central Management of Backup Plans

NEW YORK, N.Y., Aug. 6, 2015 (SEND2PRESS NEWSWIRE) – EaseUS Backup Center 5.0 has been launched recently as an upgrade of EaseUS Central Management Console. With great enhancement on central control, it's proved to be a cost-effective and all-inclusive centralized backup solution for business which is designed to easily create and configure all backup plans to various workstations or servers in network, and monitor the whole execution process.

After long time research, EaseUS, a global leader in data backup, has developed a unique central management tool for IT administrators to deploy backup plans to different clients across multiple networks, remotely control specific executing procedures and summarize every aspect of backup policy from numerous destinations.

Comparing with previous EaseUS Central Management Console, [EaseUS Backup Center 5.0](#) accelerates backup implementation process and adds two administrative ways by computer list or task list, thus consuming less time and cost. Meanwhile, it's probable for business or service providers to offer stable and reliable service to customers no matter how long the distance is.

“Attaching emphasis on business efficiency and continuity for the reason that business is vulnerable for data loss or disaster, EaseUS Backup Center 5.0 is a comprehensive management tool to safeguard crucial business data. For enterprises, centralized management contributes to sensible resource allocation and profit increase.” claims Wan Jianhua, General Manager of EaseUS Software.

Combine with [EaseUS Todo Backup Workstation, Server or Advanced Server 8.6](#) which specialize in backing up crucial document, programs and data to keep business run uninterruptedly, the central management solution enables administrators to simplify backup routine by creating backup tasks and adding single or multiple machines which implement deployed backup plans.

IT administrators who have been authorized privilege can set up user name and password to put backup policies into effect. Commands also can be conducted by default admin. By computer information, details about every machine including memory and CPU are revealed. Checking task status and update keeps admin clearly informed of the program. Through logs, all operations are reported to inspect every detail and minimize business downtime. First rate support including email ensures technical guidance to run all machines in order. Even backup projects can proceed on schedule. Sorting computers into groups spares much efforts and is an access to systematic management.

The fulfillment of central data backup management elevates business operation efficiency to a great extent. For business or service providers, EaseUS

Backup Center 5.0. compatible with Windows 10/8.1/8/7/Vista/XP and Windows Server 2012/2008/2003, separates servers from control terminal and allows administrators to take multi-terminal control on different devices. From overall aspect, it can be called as a warranty of business sustainability.
