

EaseUS Slates Data Recovery Wizard for Mac 9.5 for a Summer Launch

NEW YORK, N.Y., Aug. 26, 2015 (SEND2PRESS NEWSWIRE) – EaseUS has recently launched Data Recovery Wizard for Mac 9.5 version which is enriched by improvement on user-friendly interface, great upgrade in restoring quality and an increase in support of multiple RAW file formats and NTFS file system under Mac environment.

EaseUS, a leading role in utility software, rolls out a new look of 9.5 edition of Mac data recovery, aiming at solving tough data loss problems under various urgent circumstances, such as deleting, formatting, losing volume/partition, Mac OS crash/upgrade, virus attack or even having no access to data. Especially, after a hard disk crash, EaseUS Data Recovery Wizard for Mac 9.5 version is able to recover raw data with more file type RAW recovery supported.

In addition, with NTFS file system well supported, more data lost unintentionally can be retrieved. Comparing to 9.1 version, there is a conspicuous advance in recovery quality of 9.5 version.

This Mac data recovery software is beefed up by enhancement on interactive interface from the grounding that EaseUS has attached more importance on user-friendly experience. The scanning results are displayed by path, type and time in sequence to correspond with users' practice. Detailed information of file types including format or property ranks in order systematically. Also users can search specific sectors and file formats by inputting keywords or historical records.

This data recovery tool for Mac takes great effects in two main ways, quick scanning and deep scanning to retrieve lost photos, music, videos, audio, documents, archives, folders, emails and more. It's quite probable to consume much time to retrieve unexpectedly lost data during in-depth scanning. It's necessary to suspend the recovery process and export or import the scanning results in case of any emergency. Beside such fine-tuning to scanning course, now just double click of relevant devices can initiate the progress to get data back. Graphical interfaces of EaseUS Data Recovery Wizard for Mac 9.5 demonstrate file type to allow users to catch at a glance.

The Mac data recovery tool can recognize many storage devices from Mac notebook, desktop, HDD, SSD, external hard drive, iPod, SD card, USB drive to digital camera. Except that, with multi-language supported, it comes to the public's attention internationally.

With a ton of new features and updates that are sure to improve user experience, [EaseUS Data Recovery Wizard 9.5](#) is to remain one of the cornerstone software utility. A large amount of users who lose data under different situations win a chance to enjoy uninterrupted peace of mind.
