

# FonePaw Announces the Upgrade of iPhone Data Recovery for Windows and Mac

HONG KONG, China, Feb. 13, 2015 (SEND2PRESS NEWSWIRE) – FonePaw ([www.fonepaw.com/](http://www.fonepaw.com/)), a professional software developer that specialized in iPhone data recovery, announces the release of the new FonePaw iPhone Data Recovery. The newest version of iPhone Data Recovery is compatible with iTunes 12.1 for Windows (64-bit).

According to the company, remarkable improvements both in quality and efficiency have been made on this newly launched application. Now, FonePaw iPhone Data Recovery can recover up to 19 types of iPhone, iPad or iPod touch files, including: photos, contacts, text messages, notes, WhatsApp, Reminder, App Documents, and more. It recovers iOS devices data loss due to almost all kinds of scenarios, such as: accidental deletion, iPhone lost/stolen/damaged, Apple logo screen, forgotten screen lock password, iOS upgrade and more.

“The latest version of FonePaw iPhone Data Recovery is not only simple to use, and technically advanced, but it is affordable. We aim to provide every user the easiest way and best user experience to recover iPhone/iPad data,” says company founder Issac Wade.

“Sometimes bad things happen to good data. Murphy’s Law indicates that the data that you’re most likely to lose is the data that has not yet been backed up,” adds Wade.

Fortunately, FonePaw iPhone data recovery helps to recover deleted iPhone contacts, SMS, notes, reminders, WhatsApp, and more from iOS devices directly without needing any backup. Plus, this software supports recovering iPhone data from iTunes backup files and iCloud backup files as well.

What’s really great about FonePaw iPhone Data Recovery is that it supports selectively recovering iPhone data instead of completing a full device restore – as iTunes or iCloud would do. This will prove absolutely helpful to anyone who has accidentally deleted something and doesn’t want to restore their whole devices from an older backup.

## **More key features:**

Three recovery modes are available: “Recover from iOS Devices,” “Recover from iTunes Backup Files” and “Recovery from iCloud Backup Files.”

Preview all recoverable data (except for videos and voice memos) and selectively retrieve whatever you want.

Need only one click to get iPhone out of Apple logo, recovery mode and DFU mode.

Supports Apple(R) iPhone 6/6 Plus, iPhone 5s/5c/5/4S, iPhone 4/3GS, iPad Air, iPad Mini, iPad 4, The New iPad, iPad 2/1 and iPod touch 5/4.
