

FotoJet Announces its New HTML5-Based Graphic Tool, Now Faster and Better than Ever

HONG KONG, June 14, 2017 (SEND2PRESS NEWSWIRE) – FotoJet, an online graphic tool developed by PearlMountain Limited, a dedicated graphics software developer, just released FotoJet 6.0 – an HTML5-based version with new graphical user interface (GUI) and many new templates and resources. These user enhancements now make online graphic design and collage-making easier and faster.

Send2Press® Newswire

FotoJet 6.0 is built on the newest and safest HTML5 technology, and does not require its users to have Flash installed or updated. It works flawlessly and faster in most browsers including Chrome, Firefox, Safari, Opera, Edge, and IE11. It's also fully compatible with Windows 7/8/10, Mac OS X and Linux.

So, what makes it different from its competitors? There are a few things. For example, no download or registration is required and all basic resources and features are free. FotoJet 6.0 has more than 1,500 templates for collages, photo grids, posters, flyers, logos, social media headers, banners, cards and more. There are also thousands of resources for photo touch-ups.

It's easy for users to create unique and professional photo works with just a few clicks and there are thousands of clip art images, fonts and backgrounds

that are perfectly revamped and designed, all of which can be freely scaled without losing quality.

Henry Wong, product development manager of FotoJet, says, "FotoJet is more powerful than ever. It's more intuitive and interactive too."

The editorial team at Softonic, a software and app discovery portal, agrees with Wong. It reports that FotoJet 6.0 is a quick and streamlined way to edit and create a collection of images. It adds that not only does it offer all of the basic tools, but users can also enjoy a host of other options such as different graphics and the ability to add text to an image.

FotoJet is loved by millions of users all over the world – from small business owners and bloggers to photo enthusiasts of all skill levels.
