

# Healthcare INSIGHTS Earns Fourth Consecutive KLAS #1 Budgeting Software Distinction

LIBERTYVILLE, Ill., Jan. 29, 2015 (SEND2PRESS NEWSWIRE) – According to the just-released 2014 Best in KLAS: Software and Services report, Healthcare Insights, LLC (HCI), which provides integrated hospital financial management and cost accounting software as well as business process consulting services, continues to lead the industry. For the fourth consecutive year, HCI's INSIGHTS® software application again ranked as #1 Category Leader in the Budgeting Software and Services Category.

KLAS compiles its annual report of the top-performing healthcare information technology (HIT) vendors based on thousands of candid interviews with healthcare providers. KLAS uses this feedback to independently monitor and measure HIT vendor performance in the areas of product quality, implementation, and service and support. The coveted Category Leader designation distinguishes the top-rated vendors who not only align with healthcare provider needs but also deliver an exceptional user experience.

“We're proud of the performance our clients achieve from our budgeting offering. We work very hard to provide not only exceptional software but also implementation and training, continual upgrades, responsive service and ongoing support. This is what really sets HCI apart and keeps us at the top of the KLAS list,” said David Beto, HCI managing partner, business development and consulting services. “We don't just sell software or access to data. We provide know-how. Our people—who all have firsthand experience in hospital financial management—make sure the day-to-day users really understand how to apply the data INSIGHTS delivers to lower costs, manage resources efficiently, and support quality of care and patient satisfaction.”

Beto noted that, as the healthcare industry becomes more complex, value-driven, and data-dependent, the need to clearly understand financial, operational, and clinical information and transform that information into daily decisions is a top concern for hospital finance leaders. In this kind of accountable environment, “it's not just about what you know, but whether or not you know how to use the information available to achieve effective cost containment as well as strong clinical outcomes.”

Healthcare Insights offers an integrated, end-to-end array of business intelligence tools and services currently in use at hundreds of hospitals nationwide. In addition to INSIGHTS Core software for budgeting, financial management, and labor productivity, the company offers three additional software products: INSIGHTS Cost Accounting, INSIGHTS Patient Analytics, and INSIGHTS Long-range Financial Planning. HCI also provides [NOMISe® Consulting Services](#) for outsourced cost accounting assessment, implementation, and outsourced costing maintenance.
