What Are New Features of HitPaw Toolkit?

1 – **Resize Video** – Change the video size to post it to your social media. The best feature for users is to choose the scale of platforms such as YouTube, Facebook, Twitter, Instagram, etc., directly without needing to know what’s the detailed requirement of each platform. Fit and fill features allow you to decide how to show the video.

2 – **Merge Video** – Merge several videos are not a problem for you anymore with HitPaw Toolkit. What makes the merge feature over other software? It is that you can preview the merge effects without exporting and simply drag and drop

to change the video position.

3- **Video & Audio Converter** – HitPaw Toolkit supports converting video and audio to any format. You can extract the audio from video easily, convert video to other formats as you want. It supports importing and exporting more than 1000+ video/audio formats.

4 – **Photo Editor** – Completely free to crop, rotate, add text, and adjust photo brightness, saturation and contrast. There are many little tricks in this function, like angle, scale, palette and many more.

Other Improvements:

- 1 – All video features support importing and editing GIF.
- 2 – Add Hardware acceleration feature to speed up exporting.
- 3 – Optimize the preview of Crop&Rotate function
- 4 – Added the fine-tuning feature to trim video, long-press the start or end slider to enable.

The Whole Functions of HitPaw Toolkit

Apart from the 4 new functions above, HitPaw Toolkit also helps to cut video, adjust video, speed up or slow down video, add music to video, make stop motion video, crop&rotate video, convert video to GIF and also create meme.
