

Hotrod Tattoo of Chandler, Arizona is now a Tatt2Away Studio Center

CHANDLER, Ariz., May 31, 2016 (SEND2PRESS NEWSWIRE) – Rejuvatek Medical, Inc. officially announces the Tatt2Away® (tatt2away.com) non-laser tattoo removal system is now available for the first time in the greater Phoenix area with Hotrod Tattoo's Matt Mooneyham. The Chandler location has come on board to offer to all its clientele certified tattoo removal as the first Tatt2Away Center in the state; bringing into their high quality of service and products the all-natural system.

Send2Press® Newswire

One of the worst things Matt Mooneyham has had to do was to refer someone out for tattoo removal by lasers.

"I just felt that there had to be a better way to remove the tattoo," Mooneyham said.

And now he's found it and is bringing the Tatt2Away system to Arizona. It's fulfilling that he doesn't have to send someone elsewhere to get a laser removal – now he can do removals all in-house. With the non-laser process, of pulling out the ink from the skin where the unwanted tattoo is, he and his Hotrod Tattoo team love the hands on approach and the new skill he will be able to develop and implement in his studio.

“I love being on the all-natural side. I look forward to all the ways of how it works and being able to do it myself for our customers is ideal,” Mooneyham concluded. “I see people every day who need a removal or cover up. For me the possibilities are endless. And now the options are also unlimited for my Arizona customers.”

Rejuvatek Medical is placing around the nation Tatt2Away systems offering a limited exclusivity to those tattoo studios that see the opportunity first and act on it.
