

# IDS Adds Pushback Notifications to Interface with Byte Software

SALT LAKE CITY, Utah, June 20, 2017 (SEND2PRESS NEWSWIRE) – Mortgage document preparation vendor International Document Services, Inc. (IDS), announced it has added pushback notifications to its existing interface with BytePro Enterprise, the flagship loan origination software (LOS) platform from Byte Software. Through this enhancement, BytePro users will receive mortgage documents and fulfillment status notifications within the LOS platform.

Send2Press® Newswire

“Working between multiple systems to execute the loan production process is both inconvenient and inefficient, and it significantly increases the likelihood of errors,” said Mark Mackey, vice president of IDS. “Every integration IDS builds with its LOS partners is designed to streamline and safeguard the exchange of data between systems, allowing lenders to work within their LOS platform as much as possible. Adding the pushback notification feature to IDS’s interface with Byte is yet another step in the on-going process to perfect the LOS-doc prep interaction.”

In addition to returning and indexing executed documents, the pushback feature allows IDS to push Fulfillment XML notifications directly through the BytePro platform.

Notifications that BytePro users can choose to receive include:

- When the document package is sent to fulfillment;
- When a borrower accepts or revokes eConsent;
- When borrowers download and/or eSign documents;
- When the eSign process has been by all parties; or
- When the documents are mailed.

Pushback events automatically update corresponding disclosure log entries in BytePro, eliminating reliance on hand-keyed entries and helping to assure that compliance timelines are calculated accurately and reliably.

“We’re exceptionally proud of the seamless and complete nature of our enhanced integration with IDS,” said Mark Todd, national sales and client services manager for Byte Software. “I think it demonstrates the commitment our organizations share to create competitive advantage for our mutual clients.”

**About Byte Software:**

Since 1985 Byte Software has delivered innovative products that provide unprecedented control over the loan manufacturing process, as well as enhance the customer experience. The BytePro platform is trusted by over a thousand banks, credit unions, mortgage bankers and brokers to efficiently move loans from application to secondary loan sale.

**About IDS, Inc.:**

IDS, a Reynolds and Reynolds company, was founded in 1986 in Salt Lake City, Utah, and is a nationwide provider of mortgage documents and compliance. IDS services include electronic signatures, closing documents, initial disclosures, document fulfillment and integration with leading loan origination systems and eClosing platforms. The IDS flagship doc prep solution, idsDoc, is recognized in the industry for its ability to be customized to meet specific lender needs, particularly in regards to major industry compliance changes.
