

# [iMobie Announces AnyMirror to Mirror Phone and Tablet Screens with Synchronized Audio in High-quality without Delay](#)

LOS ANGELES, Calif., Oct. 18, 2021 (SEND2PRESS NEWSWIRE) – iMobie Inc., an innovator dedicated to enhancing software technology in the consideration of users' convenience in digital life for more than 10 years, released a fantastic mirroring application – [AnyMirror](#). This tool enables users to mirror Android & iOS screens, audio, cameras, and microphones and stream as many devices simultaneously with different content as they need.

“During the past two years, we’ve been through a hard time with COVID-19, bringing about many chaoses in daily life. People are getting used to online study, work, and home entertainment. Under this circumstance, we created AnyMirror to provide a better choice for people to work, study, or entertain on a larger screen via Wi-Fi or USB cable,” said Frank Kong, CEO of iMobie. “After experiencing the pain, I strongly believe we will finally usher in a new round of vitality and light.”

## **Key features of AnyMirror:**

### **\* Multi-Device Mirroring**

AnyMirror helps users to mirror multiple phones and tablets with different screens, audio, cameras, and mics.

– It mirrors phones and tablet screens with synchronized audio in high quality without delay and turns the phone camera into a flexibly movable HD webcam, with up to 4K resolution,

### **\* Offer Personalized Customization**

AnyMirror will offer various sharing styles to fit people’s needs and enhance using experience.

– It offers a flexible layout, separate windows, auto-rotation, and free choice to zoom in or zoom out.

### **\* Meet More Demands**

AnyMirror is more than mirroring. Apart from mirroring, it can act as a screen capture, a whiteboard, or a live streamer.

– It can record all on-screen activities and any audio users need while mirroring from various devices and capture highlights with screenshots.

- It offers various annotation tools for users during mirroring, such as adding arrows, shapes, texts, mosaics, etc.
- It provides real-time transmission of audio and video straight to Twitch, Discord, YouTube, and other platforms, or to conferencing software, like Zoom, Microsoft Teams, and so on.
