

iMobie PhoneRescue Now Restores Lost Data for Android Users with Highest Success Rate, Even Directly to Phones and Tablets

LOS ANGELES, Calif., June 5, 2017 (SEND2PRESS NEWSWIRE) – iMobie Inc., a leading software developer, today excitedly announced that its flagship product [PhoneRescue](#) now is able to save lost photos, messages, contacts, WhatsApp data, and more for Android users, with the highest data recovery rate in the industry.

Send2Press® Newswire

Built on uniquely innovative technologies, [PhoneRescue](#) is the ONLY software available that can restore essential personal data directly to Android devices, allowing users to reuse them immediately like normal. Better still, it adopts customized technologies based on each specific phone and tablet, to guarantee the most professional recovery process and the best ever result.

“PhoneRescue has successfully helped over 5,700,000 iOS users get back lost-but-valued data during the past 3 years, and we’ve also received thousands of feedbacks from Android users, who expect that we can save them from data loss as well,” said Frank Kong, CEO of iMobie Inc. “So we worked hard in the past year, optimized our unique data recovery technology, and finally brought out the new PhoneRescue, which can save both iOS and Android users from data

disaster, with the world's highest data recovery success rate."

Download PhoneRescue to get back your lost photos, messages, contacts, and WhatsApp data: <https://www.imobie.com/phonerescue/download.htm>

What you are guaranteed with PhoneRescue:

The Industry-Leading Data Recovery Rate & Speed:

Developed with cutting-edge data analysis and processing technologies, PhoneRescue guarantees you second-to-none scanning speed and the highest data recovery rate in the industry. No more hours of waiting and suffering, now you can get back what you want in as quick as a few seconds.

The Only Solution to Restore Data Straight to Android Device:

Apart from saving lost data to PC or Mac, PhoneRescue also works as the ONLY solution on the market that restores lost data directly to phones and tablets. For the first time ever, you are capable of [saving your lost messages](#), contacts, call logs, and calendars straight to Android devices for instant reuse.

The Most Data Types Coverage Rate Ever:

PhoneRescue recovers up to 13 types of the most essential data and files for Android users; covering [photos](#), messages, contacts, music, videos, etc. It even provides a complete solution to get back your lost or hidden WhatsApp chatting records and attachments, with or without rooting device.

Custom-Built Versions for Different Android Phones

To ensure you retrieve your lost data with the highest success rate, PhoneRescue is designed with 5 customized versions for the mainstream Android phone brands: SAMSUNG, Google, SONY, HTC and HUAWEI. Soon it will bring the special versions for LG and Motorola. More than a general tool, this data recovery expert makes everything unique, professional and intelligent.
