

Innovative New Personal Emergency Response System for Women

HEBRON, Ohio, July 1, 2014 (SEND2PRESS NEWSWIRE) – SentryMart – www.sentrymart.com – is announcing availability of TeleSentry™, an innovative new miniature emergency response system well suited for protection of women of all ages. TeleSentry, built to meet alarm industry standards, can get help anywhere in the USA 24/7/365 where there's T-Mobile 2G cellular service. Just press a tiny button, and a powerful built-in speaker and microphone enable 2-way voice contact with a certified emergency care dispatcher who knows who you are, and can know where you are via the U-TDOA network.

The dispatcher quickly summons the needed help, and can stay on the line until help arrives. In a medical emergency, the dispatcher can provide EMS with a summary of unique medical conditions, and any special dispatch instructions (911 operators don't have such information).

According to Don Ridgeway, CEO and President, "TeleSentry is designed to be a woman's best friend. It's hassle-free, easy to use, easy to conceal, and doesn't interfere with active lifestyles. It can provide mobile help-button protection for women of all ages. It's about time. Traditional Emergency Response Monitoring TV commercials have long focused sole attention on protection of homebound older women, ignoring the protective needs of actively mobile women. Traditional emergency response systems only provide protection in the home and within about 300 feet of the home. There's no protection if there's an emergency while away from home."

TeleSentry's design is elegantly simple, rugged and shower-safe. It's small, measuring only 1 3/4-inches x 1 3/4-inches x 5/8-inches and weighing just over an ounce. There's no hassle about keeping it plugged into a charger every night. Its rechargeable battery lasts up to 2 months between charges, and phone reminders are sent if the battery is nearly run down. Advanced cellular technology provides structure penetration and tower range greater than many cell phones.

Of great importance to women, TeleSentry provides non-demeaning invisible protection. It can be carried in pocket or purse, but is most effective when worn as a neck pendant under shirt or blouse, for easy access when seconds count. That's particularly important for active young women. According to Department of Justice statistics, girls ages 16-19 are four times more likely than the general population to be victims of rape or sexual assault. Portability also offers a great blessing for active older women living alone. It's a truism that seniors are able to live independently longer if they know that they can summon help 24/7/365 by just pressing a button, wherever they may be.

Buy TeleSentry for \$89.95. The first month's monitoring is free. Thereafter there's a continuing \$24.95/month monitoring fee, payable by automated monthly debit to credit card or debit card. There's no long-term contract,

and there's a one year warranty. There's a money back guarantee, if not satisfied return within 30 days for a full refund. Visit <http://www.sentrymart.com/> for more information or to order online.

About SentryMart:

SentryMart is a division of Target Microsystems, Inc, a Better Business Bureau A+ provider of emergency response (ERS) monitoring in Central Ohio. Since 1995, Target has provided hundreds of at-risk persons with emergency response protection.
