

IntelliMedia Networks' HoloPort and Mixie shortlisted for 2019 NAB Show Product of the Year Awards

LAS VEGAS, Nev., April 10, 2019 (SEND2PRESS NEWSWIRE) – Leading Cloud video solutions provider IntelliMedia Networks' two products have been shortlisted for 2019 NAB Show Product of the Year Awards (NAB 2019 Booth SU 8924).

Send2Press® Newswire

This Los Angeles based media-tech company delivers personalized video experiences across all screens and has proven track record in video management, publishing, analytics, and monetization. It has been providing enterprise media solutions to many Fortune 500 companies, OTT providers, SMBs, government agencies.

This year's it product launches include, Holoport and Mixie, to provide enterprise VR solutions and for live streaming with real-time graphic overlays. Both have been shortlisted for the coveted award. IntelliMedia is also showcasing AI solutions for video content.

Launching this year at NAB:

Holoport:

One of its Award nominated products, Holoport, is a hyper reality streaming solution that provides customized high impact immersive training and visualization applications.

It also lets users experience 360-degree walkthroughs with integrated AR elements. A user can experience volumetric video within this virtual environment. From hyper-realistic graphics that respond to user's presence to specialized audio that lets one hear sounds from many directions, **Holoport** facilitates it all!

This solution is extremely useful for event organizers, sports leagues, broadcasters, education and businesses.

Mixie:

It is a live encoding app (iOS) with real-time graphics overlay, which facilitates streaming of professional quality live videos simultaneously on multiple platforms. **Mixie** helps the new content creators with a simpler and quicker solution to publish their stories.

This product can be utilized for 3D visualization & asset creation; 2D and 3D animation; Photogrammetry; 360-degree video; 3D modeling and texturing; Real-time VFX Environment scanning among a host of other applications.

This product is highly recommended for sports and live event broadcasting like consumer broadcasting for social media. It's a must for organizers of the events to broadcast graduations, seminars and keynote addresses, corporate presentations, announcements and sales communications, faith-based event broadcasting and special services.

Video AI:

This is a real-time image recognition software for videos that recognizes every frame and extracts intelligent insights. Video AI can process video in real-time to recognize objects, faces, emotions, expressions, gender, converting speech to text, video metadata extraction, custom tagging workflow to name a few areas that it's powerful AI is capable of.

This product is highly useful in the areas of security and surveillance, media and entertainment, enterprise broadcasts, corporate training and education.
