

International Document Services, LendingQB Create 'Lights Out' Mortgage Doc Prep-LOS Integration

SALT LAKE CITY, Utah, Sept. 17, 2013 (SEND2PRESS NEWSWIRE) – Mortgage document preparation vendor International Document Services, Inc. (IDS), and end-to-end loan origination system provider LendingQB announced the development of a joint interface designed to create a fluid integration between the LendingQB LOS and idsDoc.

The LendingQB interface with idsDoc is a flexible and all-encompassing interface to ensure LendingQB users need never leave the LendingQB system to generate zero-default initial disclosures and closing documents through IDS. With renewed focus on data integrity from regulatory agencies, such as the Consumer Financial Protection Bureau (CFPB), true seamless system integrations safeguard the transfer of data between systems, saving lenders the cost of regulatory penalties resulting from data inconsistencies.

"The LOS partnerships we develop are some of the most important to our business and what keeps our technology relevant in an always changing industry," said IDS Executive Vice President Mark Mackey. "The kind of 'lights out' interface we've developed with LendingQB is the future of LOS-doc prep integration."

"Now more than ever it is business-critical that lenders remain in compliance within every single facet of their business, and compliant document preparation is certainly an area of concern," remarked Binh Dang, president of LendingQB. "The development of a completely seamless integration between our LOS and idsDoc ensures that the data used in disclosures and documents are completely accurate and compliant for our mutual clients."
