

iSeePassword Announces 30-percent Discount Christmas Promotion on Windows Password Recovery Pro

GUANGDONG, China, Dec. 26, 2016 (SEND2PRESS NEWSWIRE) – Windows Password Recovery Pro by iSeePassword has been a matter of discussion in the tech-savvy world. Windows users have welcomed this new approach to regaining their lost or forgotten Windows Administration Password with great regards. Many have accessed the free trial version from the company that worked fast and was absolutely safe to use; even though the company came up with two versions of the program, offering separate sets of features.

Send2Press® Newswire

To solve this problem, iSeePassword has come up with Christmas promotion, with a 30 percent discount on their Windows Password Recovery Pro. This is a huge discount that will certainly be of great benefit to the customers, who have been waiting long for the price of this tool to be reduced.

Vicky Tiffany of iSeePassword said, "We constantly received request from our willing customers to reduce the price. We have been working on this for long and Christmas was the best time to offer this gift."

One of the customers from USA, Jimmy Lawson said, "I have faced this problem of forgetting my Windows login password from time to time. Windows Password Recovery Pro from iSeePassword was the perfect solution for me. But its price

was quite high and now with their Christmas promotion 30 percent discount, I am more willing to purchase a Pro license at this time.”

The promotion will end on Jan. 31, 2017 and the discount code is available here: <http://www.iseepassword.com/promotion/christmas-promotion.html>.

The price of Windows Password Recovery Pro has been steady at \$24.95 for the Pro version and \$49.95 for advanced version. Though there is a free trial version for demonstration purpose, it was for limited usage only. For complete access to this program, a license code is required to activate the locked features. With 30 percent discount, it would certainly be easier for most buyers to purchase it.

Once the company announced this great discount news, they were asked if this discount would limit the features that are offered at this time. They confirmed that the features would be absolutely same and unchanged; only the price will be reduced so that it will help more people in future. However, they did not confirm for how long this discount offer would be valid. But, certainly the faster the users purchase the program; the more likely they are to access the discount offer that is specially meant for the Christmas period.

iSeePassword also added that to make sure that their customers do not have to face any trouble using this program, they have trained their customer support team extensively. They will assist the users throughout the process to solve any problem related to download, installation and any kind of usage. Resetting the forgotten password and creating a new administration account is absolutely simple with this Windows Password Recovery Pro.

With this added 30 percent Christmas special discount offer, it will be even more beneficial for these users of Windows computers to enjoy a comfortable and safe access to their computer without losing any of the vital data.
