

Join Brandy Vaughan of LearnTheRisk.org for Important and Free Talk 'Is Your Health For \$ale?' in San Francisco

SAN FRANCISCO, Calif., Sept. 22, 2016 (SEND2PRESS NEWSWIRE) – Join Brandy Vaughan, former Merck pharmaceutical rep and founder of LearnTheRisk.org, a campaign of the Council for Vaccine Safety, for a FREE talk on Sunday, Sept. 25, 2016 at 1 p.m. in San Francisco, as she exposes the dark side of today's 'health'care system and explains how we can stay healthy in a system that wants to keep us sick.

Send2Press® Newswire

The U.S. spends more per capita on 'health'care than any other country, yet we have one of the sickest populations. Why is this? And what can we do about it?

Big Pharma is spending billions to control the 'health'care system in the U.S. But do they really care about public health – or their profits? Are we deliberately being kept sick? Who really controls what you read and hear about the 'health'care system? Does your doctor listen to pharma reps more than patients? How do we stay healthy in a system that wants to keep us sick? Why the huge push for vaccine mandates – is it really for public health – or for profit?

This is one of the most pressing issues we face today:

If we don't have our health, what do we really have? It's now or never. We need to TAKE BACK our health! The hour-long talk will be followed by an interactive Q&A discussion about the state of 'health'care in the U.S. today.

EVENT INFO – WHEN/WHERE:

Sunday, September 25, 2016 at 1 p.m.

United Irish Cultural Center

2700 45th Avenue (at Sloat Blvd.)

San Francisco, CA

FREE street parking.

It will also be livestreamed via Facebook for those who cannot attend in person. Visit for the livestream. RSVP at healthforsale2016@yahoo.com and specify number of seats.

About LearnTheRisk.org and Brandy Vaughan:

Brandy Vaughan is a former pharmaceutical representative for Merck. She advised doctors on the Rx medications her company manufactured. Brandy sold Vioxx, a painkiller that harmed or killed thousands of Americans, and doubled the risk of stroke and heart attacks before it was taken off the market.

"From that experience, I realized that just because something is on the market, doesn't mean it's safe," she explains. Brandy left the business horrified and disillusioned at the inner workings and dealings of the industry.

As an insider, she knows that Rx's and vaccines are manufactured without adequate testing, and the huge risks that the public never hears about. She founded LearnTheRisk.org in response. It is a valuable site for information, facts and truth you will never get from media, government agencies, nor most doctors.

For unbiased information, facts, statistics and vaccine education from independent sources that are not paid by the pharmaceutical companies whose products they push, visit <http://LearnTheRisk.org/> and <https://www.facebook.com/LearnTheRisk/>.

LearnTheRisk.org is a campaign produced by the Council for Vaccine Safety, a 501(c)(3) nonprofit. Learn more: <http://councilforvaccinesafety.org/>.
