

KiwiGeeker Upgrades PhonTunes 3.0 with Music Navigation and Download, to realize the entire process of music discovery, download and management

NEW YORK, N.Y., June 4, 2014 (SEND2PRESS NEWSWIRE) – KiwiGeeker, the pioneer developer of the popular multi-device music transfer and download application, recently issued a major upgrade on its totally free music download and transfer software: PhonTunes 3.0, featuring full support for music navigation as well as music download. This popular music tool has previously only been available for music transfer and play function.

Although there are bunches of options for users if they do need music transfer, download and management, KiwiGeeker is still insisting in providing an all-in-one ultimate solution. Especially since users are often confronted with confusion about how to pick out a perfect tool if they have several tasks at the same time.

Searching around music resources and downloading them can be a tough job, especially if users fail to make an assessment for music sites. With the new added music download function in release version 3.0, users can easily access many free music resources via the six (6) music sites we provide: Last.fm, jamendo.com, mp3.com, freemusicarchive.org, archive.org and soundowl.com. Users only need one click to search and batch download the whole range of music files or along the files specified. The best perk of using KiwiG PhonTunes is the convenience to simplify the entire music discovery process: search, download, transfer, sort and manage.

PhonTunes 3.0 can not only enhance music search and download, it also tightens the original functions of music transfer and playlists management.

“It seems that users can easily find solutions to download music and transfer them between different devices. But the process is sometimes panic inducing. Users may need several different tools and take the risk of data loss,” said Mr. Beank, the Product Executive of KiwiG PhonTunes. “PhonTunes, as a thorough music service tool, can maximize time and bring convenience to users. And it is free of charge. Definitely, users who use it for once will use it forever.”

Key features in 3.0 version:

- * Music Navigation and download in one click. Batch download bunches of files or specified.
- * Users can browse songs, artist and album in most popular music sites: Last.fm, jamendo.com, mp3.com, freemusicarchive.org, archive.org, soundowl.com. Free and legal.
- * Play MP3s and other audio formats like M4A and WAV in flexible modes.
- * Manage, edit, create, delete, sort local music and playlist.

- * Transfer completed music library or single file between iPhone, iPad or iPod Touch with without iTunes assistant.
- * Resigned UI and other functions have much improved.

Price and Availability:

KiwiG PhonTunes is free of charge. Users can download it for free and Enjoy lifetime free upgrades.
