

Leading Specialty Manufacturer

Chempace Announces Contract Expansion

TOLEDO, Ohio, July 15, 2015 (SEND2PRESS NEWSWIRE) – Chempace, a global manufacturer since 1968 of leading specialty chemicals, announces the launching of a 15,000 square foot contract manufacturing expansion at the company's Toledo, Ohio facility to support the rapidly growing needs of the contract packaging industry.

Having mastered the science and art of product development, production, and packaging to satisfied customers all over the world, Chempace's contract division is the first major step in their strategy to provide an end-to-end solution for real-time contract packaging needs. Chempace's new division removes the unnecessary costs and time of working with multiple vendors typically associated when producing a product solution.

"Why mix, ship and bottle when Chempace offers an end-to-end solution?" Rick Shall, President of Chempace explained. "Chempace is committed to investing in the latest technology to improve the current conditions typically associated with packaging solutions for small to large clients. Today's marketplace is extremely competitive. Our Toledo facility expansion offers a truly cost-effective and professional packaging solution."

Choosing a manufacturing partner is the largest partnership a start-up or existing company enters into. Chempace understands selecting the wrong partner can cause delays and cost overruns which can lead to losing sales to competitors due to lower pricing. Unfortunately, most contract packaging companies require substantial orders to provide full customization and private branding. Chempace wants to be the game changer with their new contract packaging division through dedication to teamwork, technological advancements and customer-driven satisfaction guarantees.

Chempace can help small to large clients take control of their packaging needs by offering a closed-loop solution from mixing and bottling to labeling and distribution. They are able to manufacture a product with a proprietary formula, or can develop a product exclusively to meet any unique specification for a variety of household to industrial liquid filling needs; handling almost any liquid type for packaging from as low as 4 ounces to as large as 330 gallon totes or 4,000 gallon tankers in any volume required. More information can be found at <http://www.Chempace.com/>.
