

# Massey Consulting helps Eli Global position for growth with Intacct ERP

RALEIGH, N.C., Nov. 4, 2015 (SEND2PRESS NEWSWIRE) – Massey Consulting ([www.masseycloud.com](http://www.masseycloud.com)), a leading accounting software consulting firm, will assist Eli Global and companies with the implementation and configuration of cloud-based, best in class, Intacct ERP.

Eli Global, LLC and companies (<http://www.eliglobal.com/>), headquartered in Durham, North Carolina, is an international information and financial services company that acquires and invests in insurance and annuities, healthcare technology, media, market intelligence, certification, collectibles, and associated businesses. Eli Global has over 3,500 employees working from more than two-dozen locations on three continents. A long-time client of Massey Consulting, Eli Global and companies engaged Massey to assist them with their move to Intacct financial accounting.

“Our rapid growth and the international aspect of our business was outpacing our existing accounting software,” said Eli Global Corporate Director of Finance, Sandi White. “The capabilities of Intacct, including its multi-entity and multi-currency features, along with its anywhere, anytime, any device access will greatly help us manage our international businesses and streamline consolidation.”

“When I first began working with Eli Global they had two companies,” said Massey Consulting President Philip Massey, CPA. “They have been acquiring or launching 10 to 20 businesses a year recently, and will soon have over 100 entities whose financials will be tracked by Intacct.” With team members working on different continents and in different time zones, the anytime, anywhere access Intacct provides was attractive to Eli Global.

“We trust and appreciate the expertise that Massey Consulting brings to this project,” said White. “The team at Massey Consulting showed us how implementing Intacct will allow us to access the current version of the software each time we log in, without the periodic disruptions of getting everyone off of the system to install periodic upgrades as we had to do with our previous solution.”
