

Military-Fasteners becomes AS9120 Rev B certified

PONTE VEDRA, Fla., April 30, 2019 (SEND2PRESS NEWSWIRE) – Military-Fasteners, Inc. (Milfas), a company based out of Ponte Vedra that distributes aerospace and mil-spec hardware received the AS9120 Rev B certification from the [Society of Automotive Engineers \(SAE\)](#). The AS9120 Rev B certification is also known as. “Quality Management Systems – Requirements for Aviation, Space and Defense Distributors.”

Send2Press® Newswire

The SAE developed this certification based on standards highlighted on their website at: <https://www.sae.org/standards/content/as9120b/>.

This certification is specifically for companies that fall under the aerospace industry that distribute hardware and materials for their customers. Companies who are granted this certification must maintain the standards appropriate to keeping it, which means that they are subject to receiving audits on their companies on either an annual or regularly scheduled basis.

Military-Fasteners serves customers in the military and aviation industries. Their dedication to the safety of their customers is unmatched. They believe

in operating the most efficient and streamlined facility.

Military-Fasteners identifies their hardware by the spec number (AN, AS, CR, HL, MS, or NAS), according to their website: <https://military-fasteners.com/>.

JP Adorno, employee of Military-Fasteners said, "Since most of the items we sell are tiny in size, most people don't understand the significance of that specific piece of hardware. However, it can be something as small as a nickel that could determine the overall safety of the aircraft. It is this attention to detail and dedication to the safety of our customers that helped us achieve the AS0120 Rev B certification."

With the most up to date software technology, Milfas is able to ship products directly after an order is received. Their products come pre-packaged, labelled with manufacture name and lot number, and are certified by the manufacturer.

Rebekah Disser, General Manager of Military-Fasteners stated, "Receiving the AS9120 Rev B certification has been very exciting news for our company. We strive to provide excellent products to our customers, providing them with quality hardware for their needs. We proudly serve military, private and aviation clients throughout the world and this certification will even further strengthen their trust with us as one of the leaders in the aerospace industry."
