

MiniTool Power Data Recovery Version 7.0 Is Out

VANCOUVER, B.C., Canada, July 2, 2015 (SEND2PRESS NEWSWIRE) – After two years of industrious work, the new version (V7.0) of MiniTool Power Data Recovery is finally released to meet users' higher requirements in recovering lost data.

More vivid interface:

1. Version 7.0 adopts flat interfaces and this makes software more concise and attractive.
2. At the main interface, you'll find more dynamic effects are integrated into the function module buttons so that the data recovery process becomes relaxed.
3. By using the new technology of scanner, the efficiency in scanning a large database is increased 50 percent. Spend less time to recover more files.

More convenient use:

1. After clicking a module in main interface, you can see a tutorial of this module is available at the bottom of the next interface.
2. When scan is finished, you can see the found files in the last interface and the simple preview will be given in the right side if you select a file from the result list.
3. The scan result can be presented in two ways – "Path" and "Type." And you can select all files in the left side and middle part.
4. A small window will pop out during scanning to show users total file number and scanned file number at the top. The progress bar and detailed scanning information will be given as well below them.
5. For "Damaged Partition Recovery" and "Lost Partition Recovery," not every possible partition will be listed out after scan. The software will choose some of them automatically to show in front of users. So if you can't find needed data in those partitions, you may as well click "Back" to see partition list and choose other partitions to take action.

All in all, MiniTool [data recovery software](#) Version 7.0 will give you a brand new and enjoyable recovery experience.
