Benefits of Getting a Van Upfit

The benefits that come along with using Moduline Cabinets' Van Upfit solutions include:

- Maximize Available Space
- Stress-Reducing Convenience
- Ease Of Access To Tools
- A Safer Work Van Environment
- A Professional Look That Stands Apart from the Competition

Moduline Cabinets are modular and lightweight in their construction with our military-grade [aluminum van cabinets](#). Our cabinets are conveniently customizable and lightweight with a high degree of durability we guarantee to last a lifetime.

The lightweight military-grade aluminum we use will not cause the van or trailer to become overburdened. With most heavy steel or wood cabinets, an overburdened van or trailer often cannot stop suddenly and uses more gas. Lightweight aluminum has an advantage over other metals because it does not add weight to the vehicle, improving MPG, and allowing it to stop suddenly, ensuring tools and passengers are hauled safely.

The [military-grade aluminum cabinets](#) offered through Moduline also come with an array of sizes that are perfect for finding tools and odd parts that are needed on the job. Everything is expertly fitted so that it all stays perfectly in place during transit.

3 Countertop Options

Moduline Cabinets is also known for our outstanding countertop options that are available for vans and trailers. Choosing a countertop that fits working conditions provides an ideal work surface that can be utilized inside the van, trailer or other vehicle. These countertops come in three great options that include butcher-block, military-grade aluminum, and stainless-steel.

Cargo Vans We Upfit Include:

- Mercedes-Benz Sprinter
- Ford Transit
- Ram ProMaster
- Nissan NV
- And more
