

Mortgage Technology Magazine Names Global DMS to its Top 50 Service Providers List for the Fifth Consecutive Year

LANSDALE, Pa., May 7, 2013 (SEND2PRESS NEWSWIRE) – Global DMS, the leading provider of enterprise-class Web-based appraisal management software, announced that it has been named to Mortgage Technology magazine's Top 50 Service Providers list for the fifth year in a row.

According to the magazine, in order to make the list companies must excel in four primary criteria: drive the continued advancement of technology and services; provide a viable revenue model and value proposition to clients; offer exceptional customer service; and have a unique impact on the mortgage industry.

Global DMS' recent innovations are the successful launch of a workflow management engine and a compliance initiative that integrates the company's eTrac platform with leading loan origination systems. Lenders, AMCs, appraisers and other real estate entities utilize Global DMS' Web-based suite of valuation software solutions to efficiently, cost effectively and compliantly manage the entire appraisal process. Notable is that Global DMS' rapid growth created the need for the company to relocate its corporate headquarters to a larger facility in order to accommodate the addition of new employees to support growing customer needs.

"We are pleased to have again been recognized by Mortgage Technology magazine for our progress and achievements in the industry," said Vladimir Bien-Aime, president and CEO of Global DMS. "Adhering to a myriad of constantly changing state and federal compliance rules is a major concern for lenders; but, using our software, clients don't have to worry about being out of compliance."

About Global DMS:

Founded in 1999 and headquartered in Lansdale, Pennsylvania, Global DMS is the mortgage industry's preeminent provider of commercial and residential real estate valuation solutions catering to lenders, servicers, AMCs, appraisers and other real estate entities. The company's solution set is cost effectively delivered on a software-as-a-service (SaaS) transactional basis that ensures compliance adherence, reduces costs, increases efficiencies and expedites the entire real estate appraisal process.
