

# NCSCA and World Renowned Scientist Set Out to Find Conclusive Evidence on the Chemtrail Mystery

PATCHOGUE, N.Y., Nov. 12, 2015 (SEND2PRESS NEWSWIRE) – Potentially the most difficult environmental test in history is about to take place. Two volunteer environmentalists from the [National Crime Scene Cleanup Association](#) (NCSCA) are setting out to find conclusive evidence about the existence of “chemtrails.” Award Winning Director/Producer Michael J. Murphy will be documenting this incredible feat, under the watch of world-renowned scientist Dr. J. Marvin Herndon.

Chemtrails, or otherwise known as “Geo-Engineering,” is a phenomenon that occurs globally. Jets flying at high altitudes often leave behind vapor trails, known as contrails. Chemtrails differ in that they do not dissipate in a short time. Many people believe that this is due to chemicals being sprayed into the atmosphere to manipulate climate change or alter weather patterns.

The Federal Aviation Administration (FAA) will be granting waivers to allow two pilots to surpass the current Guinness altitude record in a powered paragliding aircraft of 24,898 feet. With state-of-the-art air monitoring equipment, the two pilots will be flying into the chemtrails at around 30,000 feet above sea level, battling winds in excess of 100 miles per hour and temperatures around -70 degrees Fahrenheit. The two pilots will be collecting air samples and data never before seen.

“To be a part of such an epic environmental study, all while breaking Guinness world records for both speed and height in a powered paraglider, is incredible,” says pilot Enzo Pagani.

Dr. J. Marvin Herndon, who will be submitting his report for peer review, will monitor all tests. Michael J. Murphy, whose previous work includes the award winning film “WHY in the World are they Spraying?” will be filming and documenting this process along the way. The team plans on performing the task sometime in the spring of 2016.

## **About National Crime Scene Cleanup Association:**

The National Crime Scene Cleanup Association was established to bring experts together to create safe standard operating procedures within the industry. With members servicing everything from private homes to Fortune 500 companies, the association has grown every year since formation. For more information: <http://www.crimescenecleanup.com/>.
