The Ribbon Cutting Ceremony will be facilitated by the Gilbert Chamber of Commerce, with Mayor Jenn Daniels and officers of the Chamber expected to grace the event. Refreshments will be offered. The Grand Opening Event will commence at 4 p.m. at which time the clinic be open for tours, complementary B Vitamin shots, live demos, raffle prizes, giveaways, hors d'oeuvres and cocktails. Brand representatives will be available to chat on services and products.

By utilizing concepts from the advancing fields of age management and regenerative medicine, GhentMD is designed to offer quality personalized care to those who suffer from the effects of aging including skin disorders,

obesity, chronic pain, hormonal imbalance, sexual dysfunction, stress and loss of vitality.

“I initially resisted getting involved in ‘alternative medicine.’ Early on in my career I resisted my wife’s urging to learn and adopt it into my practice. When she developed significant and intermittently disabling pain related to childbirth, it became easy to adopt after seeing her recover with the aid of alternative therapies when conventional medicine failed to help her heal. I have reached a point in my career where I feel confident about harmonizing the best of conventional, alternative and emerging medical practices,” said Dr. Anthony Aghenta, Founder and Medical Director of GhentMD.

As Gilbert, Arizona is on a mission to be the City of the Future, GhentMD is proud to support innovation in healthcare by offering exceptional patient-centered care providing services including aesthetics, regenerative pain relief, sexual rejuvenation, weight management, nutrient IV therapy, concierge medicine, and primary care.
