

# New Philadelphia Pedestrian Fatality Study Highlights Accident Statistics and Community Response

PHILADELPHIA, Pa., May 18, 2020 (SEND2PRESS NEWSWIRE) – The Pearce Law Firm, Personal Injury and Accident Lawyers P.C. has a new pedestrian fatality study which highlights accident statistics and community response.

Send2Press® Newswire

Accidents involving pedestrians resulting in serious injuries or fatalities are on the rise in Philadelphia.

In response to this disturbing trend, The Pearce Law Firm, Personal Injury and Accident Lawyers P.C. commissioned a safety study using public data from the Pennsylvania Department of Transportation and surveyed input from the Philadelphia community.

According to local pedestrians, construction areas and blocked sidewalks are the biggest problem facing Philadelphia.

**The pedestrian safety study aggregates and reports on several data sets including:**

- Philadelphia Roads with Most Fatal Pedestrian Accidents
- Philadelphia Pedestrian Fatalities and Serious Injuries by Year
- Survey of Community Threat Perception

In addition to the data compilation, charts and analysis, the study provides an overview of the current laws governing the blocking of sidewalks and Mayor Kenney's initiatives to improve pedestrian safety.

The complete study details and poll results are available at:
