

# New start-up AdaptRM launches its beta release, with new features and big plans for the future

SUNNYVALE, Calif., Oct. 21, 2014 (SEND2PRESS NEWSWIRE) – Rapid Prototypes, Inc. is pleased to announce the release of the AdaptRM Time Tracking and Invoicing beta service. Already supporting unlimited numbers of devices, this release incorporates a new invoicing ability. This option not only allows the user to track time to their various projects, but also creates professional invoices for direct transmission to clients via their preferred method.

AdaptRM aims to provide the productivity service of choice for independent contractors, consultants, and professionals. AdaptRM uses an agile development framework to deploy regular updates based on user feedback.

“Our core focus, currently, is to ensure a reliable and usable baseline tracking service versatile enough to help professionals from any field be more productive with managing their client relationships,” says AdaptRM co-founder Megan Thorsen. “We also have a clear roadmap for growth, which we foresee will only further that goal, with plans to go live for all users with improved features in December.”

First and foremost on this roadmap is our proprietary adaptive learning – perfecting the automatic assignment of each individual user’s tasks; reducing time spent sorting and increasing time for personal endeavors or additional clients.
