

New unique IoT solution launched at MWC now protects devices, kids, pets and belongings

BANGALORE, India, March 10, 2015 (SEND2PRESS NEWSWIRE) – Remo Software, an Open Interconnect Consortium Member and developer of multi-platform apps, just released the 2.0 version of Remo MORE at Mobile World Congress (MWC) 2015, Barcelona.

Remo MORE enables Internet of Things (IoT) for Home Users in a more creative way; with its unique blend of software and hardware, it empowers users to safeguard kids, track pets, secure belongings, maintain smart devices and most importantly protect the entire family.

Now control kids' online and offline activities, secure devices against theft or loss, locate pets and family members' devices on the map, boost up performance of devices and much more. Remo MORE 2.0 is now a complete device management app for a Home just like Mobile Device Management (MDM) is used in large enterprises.

In a couple of months, Remo MORE will also start shipping IoT devices like Bluetooth Trackers and GPS enabled Trackers. This IoT solution will also integrate popular IoT Home Camera Sensors and Health Monitoring devices into its system. Enabling users to track pets and belongings remotely, secure kids, monitor movements at home and keep a tab on family's health.

“With Remo MORE 2.0, we are making life easier for you,” said Omer Faiyaz, Remo Software Founder and CEO. “One app for all your smart devices at home, empowering you to take care of your loved ones and all your belongings. Our mission is to protect everyone and everything you love and we are more than willing to go that extra mile to keep your family safe.”
