

North Central Local Schools expects to save more than \$50,000 annually through a partnership with Energy Optimizers, USA

TIPP CITY, Ohio, June 20, 2018 (SEND2PRESS NEWSWIRE) – North Central Local Schools' K-12 building is set to receive a dramatic upgrade in energy efficiency through a partnership with Energy Optimizers, USA, a move that is expected to save the district more than \$50,000 annually.

Send2Press® Newswire

Starting in July, Energy Optimizers, USA, will retrofit all interior and exterior lighting systems with LEDs, upgrade the district's building controls system, provide energy-efficient enhancements to kitchen equipment and water pumps, and replace the building's roof with a higher rated insulated material. The work also includes a biannual inspection and maintenance of HVAC equipment to ensure it is running in top condition.

"We know that the best use of taxpayer dollars is in our classrooms," said Superintendent William Hanak. "The savings we attain from this project will enable us to channel more dollars toward investments in technology and other

tools that will prepare North Central students for the future.”

The expected savings will come through reduced demand for fuel, electrical utilities, and maintenance. The most immediate gains will result from the switch to LED lighting, which uses an average of 60 percent less energy and lasts five times longer than the systems being replaced.

“Our clients are tasked with preparing their students for the 21st century with very limited budgets, which is why we deliver cost-effective, turnkey solutions to improve energy efficiency,” said Greg Smith, Energy Optimizers, USA, president. “Our seamless approach enables our clients to operate more efficiently, all to the benefit of their students, staff, and taxpayers.”

About Energy Optimizers, USA:

Energy Optimizers, USA works with educational, governmental, commercial and industrial customers to implement energy savings opportunities to reduce operational costs, including lighting retrofits, renewable energy projects (wind and solar), HVAC retrofit projects, building automation retrofits and energy education programs. The company was named to the INC. Magazine Top 500 list of fastest growing companies in the U.S. (2014), was named the Fastest Growing Company in the region for two consecutive years by the Dayton Business Journal (2013, 2014), and was named a finalist in the Dayton Business Journal Best Places to Work competition in 2016.
