Her inspiration for creating the collection is, "when I am old and alone, I can look back at these cards and remember all the people who have cared for and love me."

As the 50-year mark of her collection neared, she decided to share her collection with others. Displayed together on a single web page, her card collection creates its own unique interactive work of art. A visitor to her site can click on any the cards presented to reveal each card's contents.

The collection can be viewed at <http://mylifeincards.com>.
