

# OpenClose Adds Patrick Mancier to its Software Development Team

WEST PALM BEACH, Fla., June 30, 2015 (SEND2PRESS NEWSWIRE) – OpenClose®, an enterprise-class, multi-channel, end-to-end loan origination system (LOS) provider, announced that it hired Patrick Mancier as senior software developer.

Mancier is a seasoned software engineer who possess almost 20 years of experience engineering innovative applications using the latest development techniques and programming languages. He is adept at working closely with clients to understand their unique business processes and deliver highly efficient, effective, powerful mortgage technology solutions.

Prior to joining OpenClose, Mancier was a senior developer at Reverse Mortgage Solutions, Inc. where he made significant contributions to the company's loan origination software, migrating to the .NET 4.0 framework, adding new features, enhancing functionality, and optimizing system performance. Before that he held software development positions working with retail based security systems, visitor management and passenger manifest tracking systems.

“Patrick is loaded with software development experience and also has a background in mortgage technology, specifically working with an LOS,” said Jason Regalbuto, CEO and CTO at OpenClose. “He will undoubtedly contribute significantly to enhancing our end-to-end LenderAssist™ LOS platform. We are pleased to welcome him to the OpenClose team.”

OpenClose has experienced increasing growth in 2015 with the on-boarding of several marquee clients, hiring additional staff, developing new solutions, and enhancing its end-to-end, multi-channel LOS platform.

## **About OpenClose:**

Founded in 1999 and headquartered in Palm Beach, Florida, OpenClose® is a leading end-to-end, multi-channel loan origination system (LOS) provider that delivers its platform on a software-as-a-service basis. The company provides a variety of 100 percent browser-based solutions for lenders, banks and credit unions. OpenClose's core solution, its LenderAssist™ LOS, is completely engineered by the same company using the same code base from the ground up, thus avoiding the problems that often accompany assembling best-of-breed applications or acquiring disparate technologies in an effort to create an end-to-end platform. The company provides lending organizations with full control of their data and creating a truly seamless workflow for comprehensive automation and compliance adherence.
