

# Paragon Insurance Holdings Invests in Cloud Business Intelligence (BI) to Enhance Analytics Capabilities

AVON, Conn., March 12, 2018 (SEND2PRESS NEWSWIRE) – Paragon Insurance Holdings, LLC (“Paragon”), a national multi-line specialty MGA, has selected LeapFrogBI, LLC, an agile business intelligence provider, and Sisense, Inc., to develop an advanced data warehouse and enable enhanced reporting capabilities.

Send2Press® Newswire

Since being formed in 2014 Paragon has grown rapidly to fifteen programs, with controlled premiums exceeding \$125M, and offices in Avon, CT, San Francisco, and Seattle. By strengthening the data capture and analytics capabilities on the strong systems that already exist, Paragon increases its differentiation and commitment to success.

“Adopting agile business intelligence ensures our analytics capabilities will continually fulfill their full potential,” said Enrico Ferrante, COO of Paragon. “We’re excited to be working with LeapFrogBI and Sisense to develop a solution that delivers key insights and supports strategic decision making.”

LeapFrogBI, based in Austin, Texas, enables enterprise and mid-sized customers to manage and optimize business by the numbers. Its unique BI as a Service offering is a complete cloud business intelligence solution that enables companies to achieve success with analytics without developing complex solutions in house.

“The addition of Paragon to our customer community underscores the preference modern market leaders have for cloud business intelligence, and their trust in LeapFrogBI to deliver a solution that can perform and grow along with their business over time,” said Paul Felix, partner, LeapFrogBI.

Sisense, headquartered in New York, N.Y., enables thousands of companies worldwide to turn data into insight. Its unique In-Chip™ and Single Stack™ technologies simplify every step of the BI process – from data preparation to discovery of insights.

#### **About Paragon:**

A broadly diversified MGA, Paragon provides unique opportunities and solutions to retail agents, insurance carriers, reinsurers and vendor partners. Please visit <http://www.paragoninsgroup.com/> for additional information.

#### **About LeapFrogBI:**

LeapFrogBI provides business intelligence as a service, consulting and data warehouse automation software to help leading companies leverage their data for analytics purposes. Please visit [www.leapfrogbi.com](http://www.leapfrogbi.com) for additional information.

#### **About Sisense:**

Sisense takes a radically different approach to business analytics. The company's obsessive commitment to consistent product innovation and customer success enable organizations to instantly reveal insights from complex data. It's BI for everyone, everywhere regardless of technical expertise. Sisense's agility allows business users with no technical background to get the accurate intelligence at the very moment it is needed without waiting hours, days or even weeks for answers. Sisense provides a complete business platform to prepare, analyze and visualize large, volumes and variety of data. Its unique In-Chip® and Single Stack® technologies simplify every step of the BI process – from data preparation to discovery of insights. From innovative startups to global brands like GE, Wix, Nasdaq and Philips, thousands of organizations worldwide embed Sisense in their everyday business to reveal instant insights.
