

Picas Makes Perfect Photo Artwork

SAN FRANCISCO, Calif., Oct. 27, 2016 (SEND2PRESS NEWSWIRE) – Picas (<https://www.picas.tech>), a new free photo artwork application has recently been released for both Android and iOS. With machine learning algorithms using artificial intelligence in combination with neural networks, Picas can help you turn a regular photo into famous fine art paintings with different styles and effects.

Send2Press® Newswire

Picas – Photo Artwork for Android was released on Sept. 1, 2016 and a few days later, Picas for iPhone also became available on App Store. “Create Photo Artwork Easier than Ever,” that is what Picas app developed for. In less than 20 days Picas for Android has achieved 50,000 downloads on the Play Store. Hundreds of users sharing their Picas filtered photo on social networks, turning their social platform into a photo art work studio.

“Wonderful, simple and easy to use and does not need to less than 3 seconds and is free and the bright colors of the application. This is an excellent photo artwork studio/lab application and used daily and recommend it,” said Wazir Wusu, one of the Picas lovers.

Picas has at least 70 different photo artwork filters and effects integrated in single one app. Whatever artistic styles or effects you want to add to your photos, Picasso or Van Gogh, Klimt or Dali, you can find it in Picas.

“You have the soul of an artist? Picas will help you in your creations. You’re not an artist? You will amaze your friends with the beautiful

creations made with Picas,” said Roland Lalis, reviewer of Picas.

The art photo created by Picas can be easily saved on your devices and share to your social platform like Facebook, Twitter, Instagram and others.

Thanks to artificial intelligence and deep neural networks, Picas is outstanding from so many picture artwork effects apps. Picas Inc. actually optimized the face recognition algorithm so it will make the filtered portrait photo into perfect artwork when processing it. As to security concerns, Picas cares about users’ privacy: the photos will not be saved on its servers.

Picas is now available at: <https://www.picas.tech/>.

About Picas Inc.:

Picas Inc. is a subsidiary of IObit, focusing on picture artwork and picture privacy protection. IObit, founded in 2004, provides consumers with innovative system utilities for Windows, Mac, and Android OS to greatly enhance their performance and protect them from security threats. With over 100 awards, 250 million downloads and 10 million active users worldwide, IObit is a well-recognized industry leader.
