

# PowerGuard Launches Solar Panel Warranty Verification Portal

IRVINE, Calif., June 19, 2013 (SEND2PRESS NEWSWIRE) – PowerGuard Specialty Insurance Services today announced the launch of their Solar Panel Program Warranty Verification Portal, accessible from their Web site at [www.powerguardins.com](http://www.powerguardins.com) or directly at [PowerguardSNVerify.com](http://PowerguardSNVerify.com).

The Warranty Verification Portal was developed to help those purchasing panels from PowerGuard's solar manufacturing clients verify the existence of extended warranty coverage. The PowerGuard Portal provides evidence that the purchased panels' serial numbers have been reported and that the panels are therefore eligible for coverage, based on the terms of each manufacturer's warranty insurance policy.

To access the verification portal, panel purchasers can easily and simply create a secure, password protected account, providing them with the ability to search by brand and serial number to verify coverage.

According to Mike McMullen, co-founder and managing principal of PowerGuard Specialty Insurance Services, "PowerGuard is very pleased and proud to provide this enhanced service to the many quality OEM's that utilize the PowerGuard Third Party Warranty Program – as well as delivering added value to their customers through this easy and reliable panel coverage verification process."

A recognized leader in serving the unique risk management and insurance needs of renewable energy companies globally, PowerGuard spent several years and millions of dollars researching and understanding the solar power warranty space before introducing their PowerClip® Third Party Warranty Product.

PowerGuard currently insures more than 30 million solar panels, with values exceeding \$8billion and growing every day.

Please visit the PowerGuard Solar Panel Program Warranty Verification Portal for a listing of the industry leading solar manufacturers that provide the value added service of the PowerGuard Third Party Warranty.
